DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Lilia, US Patent 5,844,983 or Helms, US Patent 5,666,426. Lilja discloses a method and apparatus for controlling a telephone ring volume. As disclosed in column 4 lines 13-23 and figure 4, the ring volume is based on an initial ring signal volume level, the current background noise (the initially sampled ambient noise level), and a subsequent background noise level. The nominal signal to noise ratio is calculated based on the initial ring signal volume level and the initial ambient noise level and maintained for subsequent noise levels. These features meet the limitations of claims 1-5. Helms discloses an automatic volume control method and apparatus comprising microphone 12 for monitoring background noise, user volume setting 22, and digital signal processor 16. As shown in figure 2 and discussed in column 3 line 45 – column 4 line 58, the apparatus controls the volume of loudspeaker 20 based on an initial background noise value and user volume setting whose initial ratio is stored (step 36). Thereafter, subsequent background noise is used to calculate a gain (volume) adjustment (step 46) of the output signal to the loudspeaker 20. The volume level is maintained based on the initial ratio. These features meet the limitations of claims 1-5.

Conclusion

Art Unit: 2615

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian T. Pendleton whose telephone number is (571) 272-7527. The examiner can normally be reached on M-F 7-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vivian Chin can be reached on (571) 272-7848. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
